## Anthology Ally

Empower learner choice. Build inclusive environments.

We know institutions worldwide serve a diverse student body with unique needs, challenges, and preferences. That is why having inclusive learning environments with full access to digital course content benefits all learners and is key for academic success. Anthology Ally works across any LMS to create more inclusive learning environments by dynamically enhancing digital course content for all learners.

The Accessibility Journey

Building a more inclusive learning environment is a continuous path that can be difficult in many ways. With cutting-edge technology and time-saving automated tools designed for inclusivity, institutions become aware of accessibility issues, keep up with rapidly changing accessibility requirements, and mitigate accessibility barriers.

An Ally for all

Equity is not about disability or ability, it is about accessibility for everyone. Anthology Ally empowers you to deliver truly personalized learning experiences, and boost learner success by building more inclusive learning environments and making digital content more accessible.

> " Ally gave us the tool to identify where and how we needed to strengthen our efforts effectively and university-wide."

Accessible content is better content

Each learner has their optimal and preferred way of learning. Empower choice with Anthology Ally by providing dynamically enhanced learning materials for learner preferences and needs, and give learners the flexibility of choosing the most effective way to interact with digital content.

Alternate content formats created by Anthology Ally have been a success at the University of Glasgow, with nearly 50% of their students taking advantage of them. These alternative formats are extremely useful for all students, not just for those with disabilities.

50% of students download content in an alternative format ✓

A sustainable change in behavior

With Anthology Ally, instructors can go beyond guidance. Thanks to built-in feedback, they can gain insights to automatically improve the quality and usability of their course materials faster and create fully accessible content with best practices in place.

> " Ally made it possible to assess the level of accessibility in all course content. CSU Chico estimates this solution has cut down content remediation time by 25%."

Go from reactive to proactive

Performance reports are key for data-driven improvement decisions. Anthology Ally makes you aware of accessibility issues to keep up with rapidly changing accessibility requirements and enables you to proactively address accessibility barriers to drive success.

> " Through a collaborative, committed effort across our campus, our institutional report shows our overall accessibility score increased 31 points in a single month with the help of Ally!"

TACOMA COMMUNITY COLLEGE

Accessibility score **increased by 31 points in a single month** ✓

LMS agnostic

Anthology Ally works seamlessly across these platforms and more:

Blackboard LEARN   **Open LMS**   **CANVAS BY INSTRUCTURE**   **brightspace** by D2L

> " Ally really is incredibly user-friendly and provides such a wonderfully visual way for academic colleagues to rapidly assess the accessibility of files that they upload to the Blackboard Ultra environment."
