

anthology Engage

Raise their engagement. Inspire their involvement.

Build and foster a meaningful student engagement experience. Motivate student involvement and strengthen your data-driven insights with an accessible online environment.

Key Capabilities:

Streamlined organization management

Powerful APIs and data integration

Guided pathways for the co-curricular journey

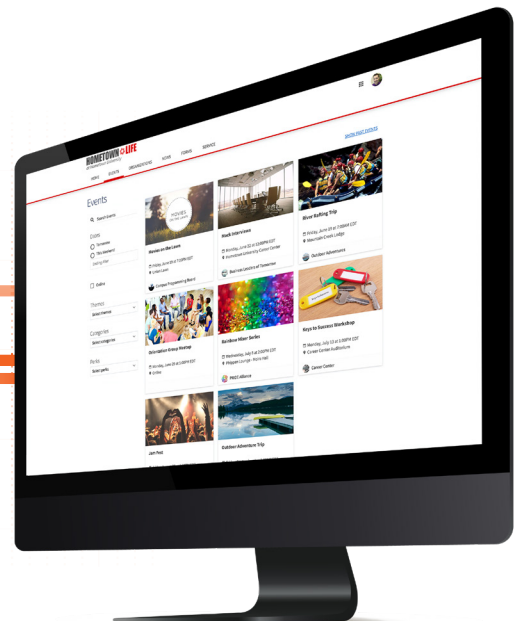

Understand student involvement

Efficient event workflows

Engage all students

Straightforward organization management structure

Create a vibrant virtual community for students. Mirror your division's structure through administrative branches and allow autonomy over organization registration, renewal, and day-to-day management.

Efficient event planning

Effortlessly plan, organize, and promote online and in-person events. Take advantage of digital event reviewer workflows, room and resource integration, and advanced RSVP functionality.

Track student involvement

Understand student involvement. Easily track participation and gauge involvement outside the classroom with automated and verified co-curricular records.

Guide the student experience

Promote student success with intentional online and in-person programming that blends guided co-curricular paths and experiences and recognizes achievements with automated badging.

Take data integration further

Get the latest data features with powerful APIs, data integrations, and stability through an accessible interface — all covered by a track record of data security and privacy.

Anthology Engage in Action

"We've built an online experience for students by using Engage to track and analyze student engagement and implement improvements for targeted opportunities, workforce development programs, and remote activities."
